CLOUD COMPUTING ADS INTERVIEW QUESTIONS

"Master these Cloud Computing interview concepts to confidently demonstrate your expertise in cloud architecture, virtualization, storage and networking, security and compliance, scalability and high availability, DevOps integration, and cloud service management—impress interviewers and accelerate your career in cloud engineering, DevOps, and IT infrastructure roles."

- [ ] What is cloud computing?

- [ ] What are the main benefits of cloud computing?

- [ ] What are the different cloud service models?

- [ ] What is IaaS, PaaS, and SaaS?

- [ ] What are the types of cloud deployment models?

- [ ] What is public, private, and hybrid cloud?

- [ ] What is virtualization?

- [ ] What is the difference between scalability and elasticity?

- [ ] What is load balancing in the cloud?

- [ ] What is high availability?

- [ ] What is cloud storage and its types?

- [ ] What is cloud security?

- [ ] What is IAM (Identity and Access Management)?

CLOUD COMPUTING ADS INTERVIEW QUESTIONS

"Master these Cloud Computing interview concepts to confidently demonstrate your expertise in cloud architecture, virtualization, storage and networking, security and compliance, scalability and high availability, DevOps integration, and cloud service management—impress interviewers and accelerate your career in cloud engineering, DevOps, and IT infrastructure roles."

- [ ] What is backup and disaster recovery in cloud computing?
- [ ] What is the difference between scalability and elasticity?
